RETIREMENT COMMUNITY

RETIREMENT APARTMENTS: LIVING COURT • LIVING VIEW • GABLE VIEW • VALLEY VIEW • SENIOR VIEW • COOK

Sept. 18, 2020

Dear Residents,

Once the smoke clears, I hope you'll find some time to wander along the Pioneer Pathway towards the Cook apartments to see all the landscaping improvements that are underway! Once complete, this space is going to be a beautiful community courtyard!

Please note: On Tuesday Sept. 22nd we are going to be applying hydro-seed (grass seed) to this new courtyard area, as well as some touch up to other grassy areas around campus (including the bare spot right outside Living Court). We will need to stay off of these areas for several weeks as the seed gets established and grass begins to grow.

We are happy to be offering some in person dining in the Meyer Auditorium starting next week (Sept. 21st), and if all goes as planned, the week of October 5th we will start to allow some dining in the regular dining rooms. Watch for updated information on that to come out in the next couple of weeks. In person dining will continue to look a little different for quite some time so please be patient with our dietary staff as we work out all of the kinks and new procedures in order to dine as safely as possible.

We are thankful that we have continued to have almost no COVID cases on our Living Care campus. Just this week we had one nursing home resident test positive for COVID. This person has no symptoms of the disease and is being isolated and monitored closely.

Going forward as our campus and the community continues to slowly open up, we continue to urge you to be very wise and careful with your interactions both on and off campus. Thank you for helping keep our campus and all of our residents safe.

Sincerely,

Eva Lounsbury
Resident Services Director
